

Opportunity to participate in research program

The *All of Us* Research Program is creating the largest health database in history.

Why participate?

By telling us about yourself, researchers can look for patterns, and learn more about what affects people's health. The goal is to understand what makes people sick, and to develop new treatments.

What's involved?

Participants must be 18 years or older. You will complete health surveys, provide blood and urine samples, and give your consent to share your electronic health record.

Participants will receive a \$25 gift card for completion of study visit and parking is validated.
